

ANDREW MARCUSE

andrew.marcuse.info

andrew.marcuse@gmail.com

Summary I am a seasoned (but not too salty) software architect with a proven track record. I want to make great things. Let me help you!

Technology

- Java, JavaScript, Python
- SQL, MySQL, Microsoft SQLServer, Postgresql
- HTML, CSS, SVG, PDF
- Amazon Web Services (AWS), Google AppEngine, Heroku

Experience **VP Technology** 2000 to present
An Online Tournament Management Provider

Technical co-founder. I designed and wrote the initial system and managed its evolution to meet 15 years of challenges without interruption. The system now supports thousands of customers with millions of users in 4 languages from 5 continents doing hundreds of thousands of transactions per year.

Director of Systems Architecture 1997 to 2000
Ceridian HR/Payroll Systems

Created the Source 500 product, a combination of the original FLX software with support for Ceridian's existing Signature backend.

Senior Developer 1989 to 1997
Ceridian (FLX Corporation)

Technical point person during Ceridian's acquisition of FLX. I oversaw an intensive two week performance and functionality review during due diligence.

Enhanced the existing DOS product to be multi-user, client/server with support for multiple plan years and custom graphical forms.

Created an entirely new Windows-based product that scaled from simple standalone PCs to client/server networks supporting thousands of employees.

Education BA Physics, Concentration in Computational Science
Haverford College
